Report: Description in (min 250 to max 800 words)*

The Viksit Bharat Club organized a Debate Competition on the topic "Just Degrees Won't Build Viksit Bharat" with the objective of encouraging students to critically analyse the role of education, skills, and values in nation development. The programme aimed to promote intellectual engagement and provide a platform for students to express their perspectives on the relevance of degrees versus practical knowledge and competencies.

The session commenced with an introductory address highlighting the importance of holistic education in today's rapidly evolving world. The students were encouraged to reflect on the idea that while academic qualifications are important, they must be complemented by skills, innovation, ethical values, and practical application to contribute effectively towards nation-building.

Participants actively engaged in the debate by presenting arguments both in favour of and against the motion. The students speaking in favour emphasized that degrees alone are insufficient without practical skills, creativity and problem-solving abilities, and real-world exposure. They highlighted the importance of vocational training, entrepreneurship, and experiential learning in building a self-reliant and developed India.

On the other hand, Ms. Janvi and Ms. Shivani presenting arguments against the motion discussed the significance of formal education, structured knowledge, and academic qualifications as the foundation for professional growth and societal contribution. They argued that degrees provide credibility, discipline, and a framework for learning, which are essential for national progress.

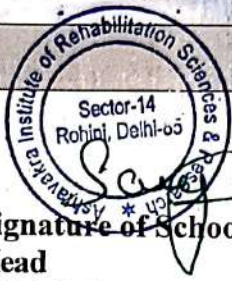

The debate witnessed enthusiastic participation, logical reasoning, and effective communication from students. Participants demonstrated confidence, clarity of thought, and the ability to present balanced arguments. The session encouraged healthy competition, respectful exchange of ideas, and active listening among

students.

The performances of the participants were evaluated based on criteria such as content relevance, clarity of argument, confidence, communication skills, and overall presentation. The competition provided an opportunity for students to enhance their public speaking abilities, critical thinking, and analytical skills.

At the conclusion of the event, winners were recognized and appreciated for their outstanding performance. The programme reinforced the understanding that nation-building requires a combination of knowledge, skills, innovation, and ethical values. It aligned with the vision of Viksit Bharat by emphasizing that empowered, skilled, and responsible youth are the key drivers of a developed nation.

Overall, the Debate Competition was conducted successfully and proved to be an intellectually stimulating and engaging activity. It contributed significantly to the development of students' communication skills, confidence, and awareness regarding the broader dimensions of education and national development.
